

Famlink

An intuitive and easy way for teachers to notify parents!

Introduction to Famlink:

- Do you ever wish that you can find a way to message a parent? Famlink is an aura and goated way to do this.
- Registered parents can specify teachers for their children. The teachers can send notifications to these parents.
- The Go web app is not for multi school districts. Each school district will host the web app on its server.
- Admin tasks are to add schools and teachers in the district. Set password for self and teachers. The path for this is **/admin**

- For convience, all teachers have the same password set by the district admin.

- Teacher has to get user name first. The path is **/username**

The teacher's user name is generated and the teacher has to click **Save** before logging in at **/teachers**

- After registering, parent can log in to add student(s), specify teacher for the current school year. For next school year, if the child has new teacher; parent can use Change Teacher menu. If the teacher sends notifications, the parent will see them. After this happens, the parent can finally have the full desired experience! Let's go!
