

Project Name

Famlink enables teachers to send notifications like parent-teacher conference appointments, etc... to parents. The requirements:

Software:

- *Golang:* <https://go.dev/>
- *The Golang version:* *go1.25.7 used to build.*
- *Mysql Server:* <https://dev.mysql.com/downloads/mysql/8.0.html>

Usage:

District:

- Each school district has to host the web app. The web app is not for multiple districts.
- For a school district, the district admin has to add schools, teachers of these schools and set up passwords for self and the teachers. The admin lets the teachers know the password. All teachers have the same password. The admin logs in at **/admin**
- **The default admin password is orange**
- **The default password for all teachers is chalk**
- A teacher can get his/her user name at **/username** and logs in at **/teachers**
- A parent registers, logs in, adds student(s), and specifies the student's teacher. Parent's participation is crucial. Therefore, ask parents to register, log in, add students, and specify teacher. Parent logs in at **/login**

Author

Created by nguyen2041@hotmail.com <https://github.com/nkn300pm/famlink>

Features

- Teacher sends notifications to parents. Manage notification history like listing, deleting or editing.
- Parent registers, adds student, and specifies teacher. Next school year, if the child had new teacher; the parent could use Change Teacher link.
- If a child goes to a new school and the school uses the web app, the parent can click Change School. After that click Specify Teacher.

Installation

1. Run **famlink.sql**. You can use phpMyAdmin or Mysql Workbench. To run the famlink.sql successfully, the user should have CREATE, REFERENCES, select, insert, update, delete, etc...
2. Open **sql.go** file and specify values for “user:password” part of the connection string. The user should have select, insert, update, delete privileges on famlink database.
3. Compile by going to command prompt and do **go build**
4. **Run famlink.exe on Windows or ./famlink on Linux. Go to localhost:8085**
 - **Admin page is /admin**
 - **Parent pages: /register, /login**
 - **Teachers visit /username to get generated user name. Make sure to click Save before being able to use the username. Also visit /teachers is to log in.**
